

Project 2 Evaluation Report				Student # 1 Name & Number	Student # 2 Name & Number	Student # 3 Name & Number	Student # 4 Name & Number	Student # 5 Name & Number
Project Title		Examiner						
Supervisor	Topic	Below Standard	Acceptable					
Part 1: Product Vision & Project Planning (5%)				0	0	0	0	0
CLO1 (5)	Idea & motivation of the product	Mark: [0-2] The product problem is unacceptable or below standard for a graduation project	Mark: [3-4] The product problem is acceptable for a graduation project	Mark: [5] The product problem is competent for a graduation project				
Part 2: Product Requirements & Features (10%)				0	0	0	0	0
CLO2 (7)	Functional Requirements	Mark: [0-3] The team provided poor features, Use Case diagram, and Use Cases detailed descriptions	Mark: [4-6] The team provided acceptable features, Use Case diagram, and Use Cases detailed descriptions	Mark: [6-7] The team provided competent features, Use Case diagram, and Use Cases detailed descriptions				
CLO3 (5)	Nonfunctional Requirements	Mark: [0-1] The team provided low or unacceptable nonfunctional requirements	Mark: [2] The team provided acceptable nonfunctional requirements	Mark: [3] The team provided competent nonfunctional requirements				
Part 3: Architecture, Design and UML Modelling (10%)				0	0	0	0	0
CLO3 (3)	Software Architecture	Mark: [0-1] The architecture provided poor subsystems, their internal interactions and diagrams like component diagrams.	Mark: [2] The architecture provided acceptable subsystems, their internal interactions and diagrams like component diagrams.	Mark: [3] The architecture provided competent subsystems, their internal interactions and diagrams like component diagrams.				
CLO3 (3)	UML sequence diagrams	Mark: [0-1] the team provided poor sequence diagrams to show the interaction between the objects that carry out each Use case.	Mark: [2] the team provided acceptable sequence diagrams to show the interaction between the objects that carry out each Use case.	Mark: [3] the team provided competent sequence diagrams to show the interaction between the objects that carry out each Use case.				
CLO3 (4)	Class Diagrams & Database Design	Mark: [0-1] the team provided poor class diagrams that didn't capture all classes, data, attributes and methods. The methods in class diagram didn't match the objects interactions in the sequence diagrams	Mark: [2-3] the team provided acceptable class diagrams that captured most of the system classes, data, attributes, methods and relationships. The methods in class diagrams mostly match the objects interactions in the sequence diagrams	Mark: [3-4] the team provided excellent class diagrams that captured most of the system classes, data, attributes, methods and relationships. The methods in the class diagram match the objects interactions in the sequence diagrams				
Part 4: Presentation & Product Demo (45%)				0	0	0	0	0
CLO3 (25)	Presentation & Features Demo	Mark: [0-10] The implementation & Demo don't show the main character features of the proposed product	Mark: [11-20] The implementation & Demo show acceptable demonstration of the main character features of the proposed product	Mark: [21-25] The implementation & Demo show competent demonstration of the main character features of the proposed product				
CLO3 (20)	Code Value & Understanding	Mark: [0-5] The student showed poor understanding of the code	Mark: [6-14] The student showed acceptable understanding of a worthy code	Mark: [15-20] The student showed competent understanding of a worthy code				
Part 5: Software Testing (15%)				0	0	0	0	0
CLO3 (15)	Software Testing	Mark: [0-4] The software testing poorly used tools and didn't cover most of the system use cases.	Mark: [5-10] The software testing is acceptable in using tools and systematically covers most of the system use cases (test cases).	Mark: [11-15] The software testing is excellent in using tools and systematically covers system use cases (test cases).				
Part 6: Reports & documentation clarity (all must be submitted via eLearning) (15%)				0	0	0	0	0
CLO5 (10)	Group Report	Mark: [0-5] The report is poorly organized and lack Clarity.	Mark: [6-6] The report is acceptable and clear. It mostly documents the project according to the report template.	Mark: [7-10] The report is excellent and clear. It clearly documents the project according to the report template.				
CLO5 (5)	Individual Report	Mark: [0-2] The report is poorly organized and lack Clarity.	Mark: [3] The report is acceptable and clear. It mostly documents the students activities according to report template.	Mark: [4-5] The report is excellent and clear. It clearly documents the students activities according to report template.				
Important: Students must fail the course if they do not meet any of the following requirements: (1) Unable to demonstrate full ownership of the work they submit. (2) Unable to successfully demo their work. (3) Did not submit all required reports through eLearning. (4) Received a failing evaluation from the supervisor or from the two committee examiners.				Total Grade (100)				
				0	0	0	0	0
